

Manual for the Firmware Update

(Please go through the following steps to install the update successfully)

1. Please download the update file to a blank, FAT32 format USB stick.
2. Turn on the unit and insert the stick.
3. Turn on AUX mode and set the device volume to zero.
4. Then, press the volume knob until the firmware version appears on the display.
5. Then press the volume button ... update starts.
6. After a successful installation, the device switches off.
