1. Introduction

Congratulations on purchasing the Bluenavi24 Navigation Software. Bluenavi24 is a state of the art navigation software designed to make your journey more efficient and productive. Bluenavi24 offers the following features to make travelling and navigating through your neighbourhood easier:

- Dynamic route calculation
- Set and manage multiple waypoints en route to your destination with ease
- Powerful and convenient address search (Postal code/street search)
- Accurate moving map display
- Turn-by-turn voice instructions and mini maps
- Voice output engine
- Comprehensive and detailed map and Points-of-Interest (POI) database
- Easy to use and intuitive interface
- Space efficient
- Compatible with PC, PDA and Personal Navigator Packages.

Bluenavi24 would like to thank you again for purchasing Bluenavi24, and hope that it will assist you in your travels in the many years to come.

For the latest news and updates, product support, and information regarding Bluenavi24's range of GPS products, please visit Bluenavi24's website at http://www.bluenavi24.com

2. Installation and Hardware Setup

2.1 Software Installation

To run the software legally, the user has to get a license key by registration process. The license key is encrypted by the combination of the device ID, which could be your SD card ID, and a map code. Also, please note that the license key is per map region. Each map region has its own map code, and thus you should have different license key for each map region. E.g. the map codes for BeNeLux, Germany and Taiwan could be BeNeLux@2011H2, Germany@2011H2 and Taiwan@2011H2, respectively. If the software you have is not equipped with legal map licenses, the security warning pages will pop up to remind you of finishing the process to have legal licenses at the beginning of running Bluenavi24.

2.1.1 Map code

As explained above, the license key is encrypted by the combination of the device ID and the map code. To know your map code, enter *Main Menu*, choose *Info* ->*Map*.

As shown above, each entry has an icon, indicating if the corresponding map is legal or not, a map code and the date code. As an example, the first two illustrates the region Australia has a map code Australia@2009H2 and the region Austria/Switzerland has a map code Austria@2011H2.

2.1.2 Registration

The software may not run with full functionalities and successfully if the map data is not with legal license.

The license key is calculated based on map code and device ID. If you have not a legal license of map data, you will be warned by the message "Unregistered map(s) found!" at the moment you run the software as below. Press OK to check the illegal map data you use, where a forbidden icon are shown below.

	Wa	Irnin	g	
Unregist Contact	ered ma with you	ap(s) ur lo) found cal dis	d! tributor
Device I	D: [R65	4 20	23 96	RJ]
	OK		Exit	

To get a license key, you need to send the Device ID and the map code to the original distributor to request a legal license key to that map data once you have paid for it.

It would be strongly recommended to register your personal information to the server of the original distributor once you have the license key in case you need to retrieve the map data due to the SD card corrupted.

After having the license key for that map region, simply save the *.key file under \Bluenavi24\Map folder finish the activation process.

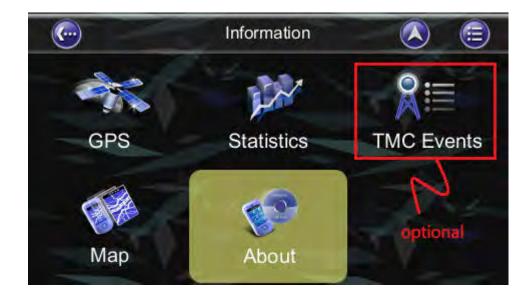

2.1.3 Device ID

To know your Device ID, entering *Main Menu* →*Info* →*About*

(About		6

2.2 Hardware Configuration (PC/PDA Only)

After installing Bluenavi24 on your PC/PDA, Please ensure your GPS hardware has been correctly setup. For instructions on GPS hardware setup, please refer to your GPS hardware manual. You will only need to do this once. Once the GPS hardware has been setup, please take note of the Port Settings for your GPS. You will need this to configure the settings in Bluenavi24.

Press the *Settings* in the *Main Menu* and then press *GPS Port*. Now change the COM Port and Baud Rate to the given values.

3. Getting Started With GPS Navigation and Bluenavi24

This tutorial will get you started on using Bluenavi24 for navigation. Before you start, you should ensure that the software has been installed and the necessary hardware configured. Instructions for installation and configuration can be found in the *Hardware Configuration Section* of this manual.

Step 1

Start Bluenavi24 and wait for your GPS receiver to obtain a position fix.

Press the center area on the touch screen to obtain the **Main Menu**, and press the **Find Button** in the Menu.

If you do not have a GPS fix, or want to *simulate* a route, select a *starting location* first using this tutorial up to **Step 5**, then select a *destination* using this tutorial a second time.

Step 2

Press the **Address Button** in the Find Menu, Press the **Region Name Tab** to Select / switch the country.

Step 3

Enter **City** on the onscreen keyboard.

		=							
<enter< td=""><td>D((></td><td>one 300)</td></enter<>	D((>	one 300)							
1	2	3	4	5	6	7	8	9	0
0	W	E	R	Т	Y	U	1	0	Р
A	s	D	F	G	Н	J	К	L	
Z	X	С	V	В	Ν	М	-		t
123 ABC D				el	CI	ear			

Step 4

Then enter the **Street info and House Number info.** Or, click City Center.

	City Center									
<ente< td=""><td colspan="9"><enter street="">_</enter></td></ente<>	<enter street="">_</enter>									
1	2	3	4	5	6	7	8	9	0	
Q	W	E	R	Т	Y	U		0	P	
A	S	D	F	G	н	J	К	L		
Z	x	С	V	В	Ν	М	-		1	
		123 ABC			36	D	el	CI	ear	

	City Center									
<ente< td=""><td colspan="10"><enter street="">_</enter></td></ente<>	<enter street="">_</enter>									
1	2	3	4	5	6	7	8	9	0	
Q	W	E	R	Т	Y	U		0	Ρ	
A	S	D	F	G	Н	J	К	L		
Z	x	С	V	В	N	М			t	
	123 ABC Del				el	CI	ear			

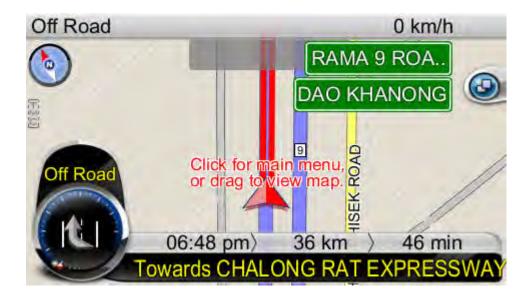

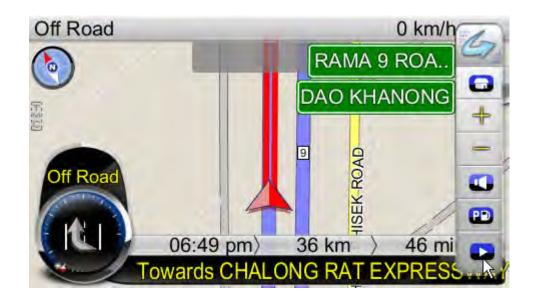

Location Menu

then press the **Go To Button** in **the Location Menu** to begin navigation. Bluenavi24 will calculate a route to the destination from your current location.

After calculating the route, you could also see the simulation of the route by clicking on the sub menu icon of the map on the top right side.

	Co Demo				(=)
0	Repeat	Speed	4	łх	
I	Towards CH O NGOEN	IALONG RAT EXI	PRESSWAY	2 km 2 min	*
1	CHALONG WANG THONG	RAT EXPRESSW	AY	23 km 27 min	1/3
K	Towards SR BANG KAPI	I RAT EXPRESS	WAY	23 km 28 min	1/3
	Towards SR BANG KAPI	I RAT EXPRESS	WAY	24 km 29 min	
		Start Der	no		

Step 5

You can begin using your GPS system if you have a GPS fix. If you do not have a GPS fix, you can use the **Demo** feature to simulate the route to your destination using. You can now drive to your destination, and you will be guided by voice commands at every turn and the Navigation Screen. For more information about advanced functions, please read the rest of this manual.

4. User Interface

4.1 Main Menu

The *Main Menu* provides access to XRoad's many features. You can access the *Main Menu* by pressing any where in the map screen. The following features can be accessed from the *Main Menu*.

Find: Search for a destination.

Map: Return to the map screen or Navigation/Free run screen.

Route: Access the current route, itinerary, statistics and map information.

Settings: Configure system and routing settings and manage favourites list.

My Data: Maintain user specific information like Favourite, Itinerary, and Trail ...etc.

Info: Display GPS, driving information (Statistics) and information about Bluenavi24 version.

Exit: Exit Bluenavi24.

All submenus contain the following features on the top panel at the top of the screen:

Back Button: Return to the previous screen.

Map Button: Return to the Map Screen or Navigation/Free run screen.

Menu Button: Return to the Main Menu.

4.2 Map Screen

The *Map Screen* displays a map of your current location, as well as displaying nearby POIs and information. You can also use it as an electronic map.

When in *Navigation/Free Run Screen,* by panning the map, you can enter the Map Screen. Note that if you're using Heading-up in *Navigation/Free Run Screen*, then the *Map Screen* will follow the orientation. By click the *North Indicator*, the Map Screen will change to North-up. Once in North-up, it can't return to Heading-up.

Map screen

Navigation screen

The following features can also be accessed from the Map Screen.

4.2.1 Functions

Selected location (road or POI) will be Highlighted

4.2.2 Map Displays

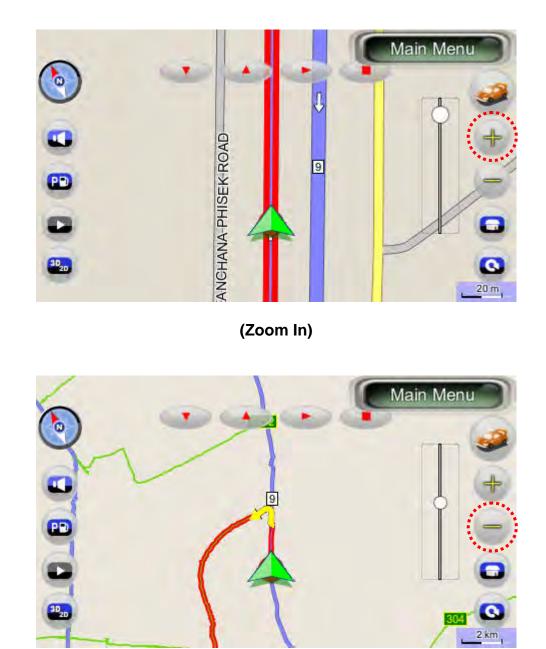

- : Starting Point
- : Waypoint
- : Destination
- : Next Turn
- : Turn
- : Selected Point of Interest
- : Point of Interest
- : Selected Location
- : Selected Street
- : Current Location/GPS Fix Location

4.3 Zoom In/Zoom Out

You can change the scale of the electronic map by pressing the **Zoom In/Zoom Out buttons**. If you have a position fix, it will zoom in/out on your current location. If you are in panning mode, it will zoom in/out on the selected location marked by the red dot.

(Zoom Out)

Note: Local streets will not be displayed at large map scales. At large map scales, only the main roads and freeways will be displayed. To view them you must increase the map scale by zooming in.

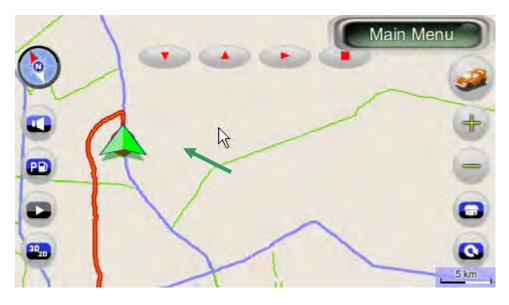

4.4 Panning (Browsing the map)

You can browse different areas of the map in the map screen by dragging the map. Simply hold your finger down on the screen and drag it in the opposite direction.

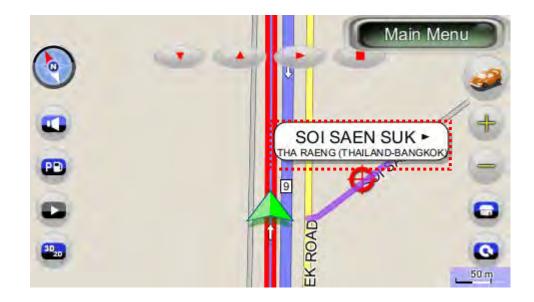

(Pan to the left)

4.5 Location Menu

You can select locations (POI lcons) or streets on the map by pressing the icon or location and pressing the *Street/Place Information Panel*. The *Location Menu* will then appear. The *Location Menu* will also appear when you select a location from the *Find Menu*.

(Location Menu)

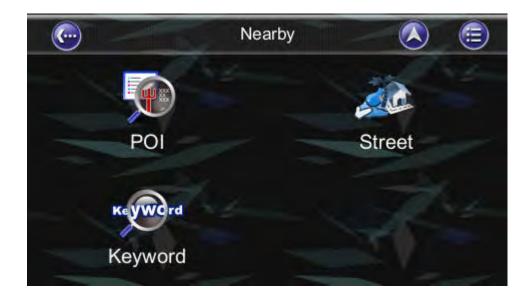

4.5.1 Functions in the Location Menu

Nearby: Displays a list of nearby POIs or streets.

Save As: Save the location as your Favorite.

Info: Information about the selected location, including Region, City, Longitude, Latitude, Street, House number...etc.

@	-	Street SOI SAEN SUK			
Region	THAIL	AND-BANGKOK			
City	THA R	AENG			
Street	SOI S/	AEN SUK			
Longitude	100.68	30810 E	Go To		
Latitude	13.871	990 N			
				Advanced	
Neart	y	Save As		Мар	

Go To: Set the destination for route planning.

Advanced: Add intermediate waypoint in route to your destination.

Or, set the location as the start point to simulate the route.

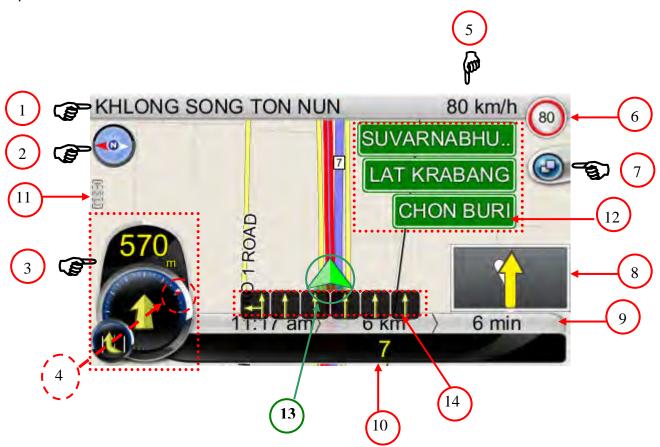

4.6 Navigation Screen

The Navigation Screen will appear whenever a route has been set. It is basically a Map Screen with additional information about the route, such as distance until next turn, travel time, and estimated time at arrival. The screen will be centred on your current location (when you have a GPS fix, or else simulation will move at a constant velocity). To exit the *Guidance Screen*, simply pan the map. To return to the *Guidance Screen*, press the *Car Position*.

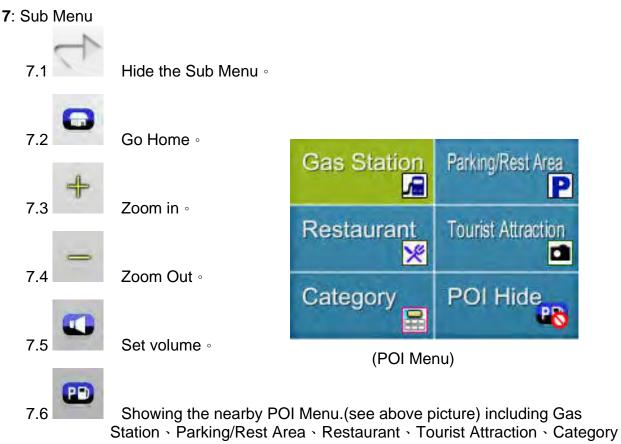

1: Showing the current street info or current city info. (Click to switch)

2: Guidance symbol : Switch between 2D North-up, 2D Heading-up, 3D Head-up views

3: Showing the Distance to Next Turn, Maneuver at Next Turn and serial Turn. (Click on the icon to repeat voice instructions)

- **4**: On the periphery of the Next Turn symbol, there are two dots : the Red Dot showing the direction of destination, and the Yellow Dot showing the Special Location. The special location will show only when you set in My Favorite.
- **5**: Showing the current speed or current time. (Click to switch)
- 6: Speed Limit : Showing the Road Speed limit info.

and POI Hide

7.7 Start Simulation. When having set the destination and routing, this bottom could be chosen. Click to see the simulation of the route and you'll see there is a row of control line showing in the Top middle of the screen (See bellow)

- 8. PIP (Picture in Picture).
- 9: Estimated Time at Arrival / Total Distance Remaining / Total Time Remaining.
- 10: Instruction for Current Turn. (Press to Access the Turn List)
- 11. TMC info.
- 12. Road Sign.

13. Car position : Green (GPS signal good) · Yellow (GPS signal weak) · Red (GPS signal lost) · Gray (Simulation)

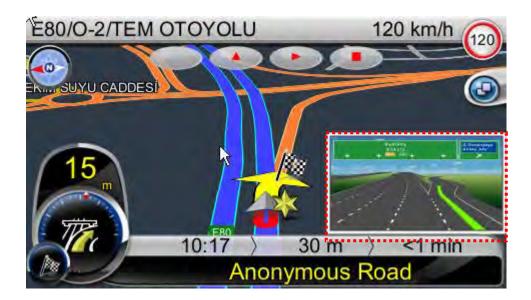

14. Lane Marking : Showing the Lane instruction on the road.

4.6.1 Junction View

Driving on the highway exit or complex intersection, *Navigation Screen* will show the real view of the intersection in the lower right corner, it is called "Junction View". When we drive close to the intersection, the junction view will fit all screens.

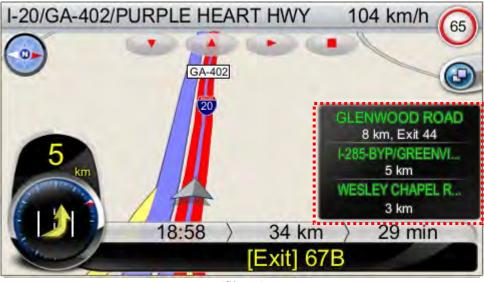

4.6.2 Highway information (Click to hide/show)

When we driving on the highway, there will shows 3 lines of highway information in the lower right corner of the *Navigation Screen*.

The car and road links will shows on the center left. You can click on the "Highway information" to hide or show.

(Show)

(Hide)

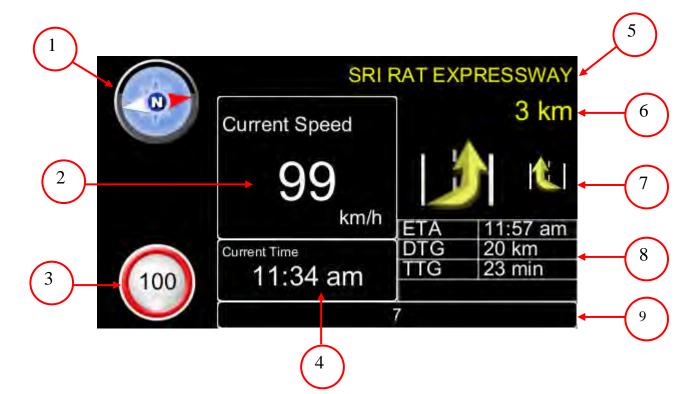

(center left)

4.6.3 HID Mode

In R6.0, there is a new navigation screen mode called HID Mode.

- 1. Compass
- 2. Current speed •
- 3. Current Speed limit
- 4. Current Time
- 5. Next Turn
- 6. Distance to the next turn
- 7.: Icon of Next Turn (Big one) and next next turn (small one)
- ETA (Estimated Time of Arrival)
 DTG (Distance To Go)
 TTG (Time To Go)
- 9.: Current Road information

4.7 Free Run Screen

The Free Run Screen will appear whenever a route has NOT been set. It is basically a Map Screen with additional information about the current road/city you're driving on, and driving speed. The screen will be centred on your current location (when you have a GPS fix). To exit the *Free Run Screen*, simply pan the map. To return to the *Free Run Screen*, press the *Car Position*.

4.8 (Option) User Added Speed Camera

In the *Map Screen*, user can *Added Speed Camera* point whenever you want. You can select streets on the map by pressing the icon and the *Add Speed Camera Icon* on the pop-up *Street/Place Information Panel* right down, your screen will go to *Speed Camera Panel*. Then press Add (+) icon, the *Map Screen* will appear Speed Camera icon.

(Speed Camera Panel)

Speed Camera icon

When you click Speed Camera icon, it will pop-up *Speed Camera Infromation Penal*, on the right down will show remove speed camera icon.

Remove Speed Camera icon

5. Finding Destinations

Bluenavi24 offers many methods to search for a particular destination. This is useful as you can pinpoint the search locations and minimising your search time. Once a destination has been found, the *Location Menu* will appear, and Bluenavi24 will calculate a route to the chosen destination when you press the *Go To Button* or the *Add Via* Button. You can also use the *Find Men*u to set a *Starting Point for route simulation*, as explained in the *Getting Started Tutorial*.

5.1 By Address-City/Postal Code First

5.1.1 Main Menu ->Find ->Address ->City/Postcode

Enter the city name of postal code using the onscreen keyboard. You can also enter a key word if you are unsure of the location as Bluenavi24 will list all possible locations with that key word. Once you have found the destination, Bluenavi24 will load the Location Menu.

5.8 By Photo

Main Menu ->Find ->Photo

Bluenavi24 could use JPEG/EXIF file to get the location. EXIF (EXchangeable Image File) data could save the information in the JPEG file when taking the picture by digital camera.

If the JPEG photo does not include the coordinate data, Bluenavi24 will not adapt it and the "OK" button will not be allowed to press.

PS. The default folder for the picture is in the \Photo folder, you could press the ".. " (at the top left) and go to upper directory.

5.9 By POI Category

Main Menu ->Find ->Category

Bluenavi24 allows user to search a destination by POI

Category.

5.10 Entering Information

When performing searches, you will be prompted with the onscreen keyboard to enter keywords for the search. You can alternate between alphabetical letters (ABC) and numbers/symbols (123) by pressing the *Switch Button*.

	🧽 All Cities 🚫 🗐								
<ente< td=""><td colspan="8"><enter city=""></enter></td><td>one 300)</td></ente<>	<enter city=""></enter>								one 300)

		12	23	AE	BC	D	el	CI	ear

(All	Cities]			E	
<enter c<="" th=""><th colspan="7"><enter city=""></enter></th></enter>	<enter city=""></enter>						
1	2	.3			1	@	
]]	ā	6			-	"	
7	8	9		7	8	5	
~	0	-	1		H.		
		23	ABC	De	ı [Clear	

5.11 Searching in Different Countries

If you want to change the country you are searching, press the *Country Name Tab* when in one of the Submenus of the *Find Menu:*

Note: Before you can search for places in a country, you must have the map of the region. Bluenavi24 lists all the maps you have installed in the Country List, so if the country is not listed, it means that you either don't have the map for that country, or that the map for that country has not been installed.

Note: You can perform international searches and calculate international routes if you have the maps of the relevant countries.

6. Advanced Routing Features

6.1 Making Detours

Route ->Turn List ->Select the street or location ->Detour

The route is recalculated to take a detour around the location or street.

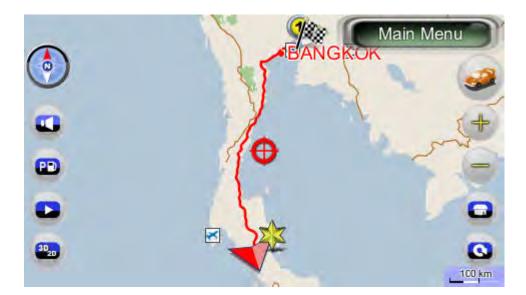

6.2 Adding Intermediate Waypoints

Map Screen ->Select a location ->Location Menu -> Advanced -> Add Via Or

Main Menu ->Find ->Find a destination ->Location Menu -> Advanced ->Add Via

You can add additional waypoints en route to your destination by using the *Add Via Button*. Simply find a destination using the *Find Menu* or by selecting it from the *Map Screen*. Once in the *Location Menu*, press the *Add Via Button*. This location will be placed between your starting/current and final destination. For multiple waypoints, they are added in sequential order for convenience. You can manage the list of intermediate waypoints using the *Itinerary List*.

6.3 Changing the End Destination

Map Screen ->Select a location ->Location Menu ->Go To ->Extend

Or Main Menu ->Find ->Find a destination ->Location Menu ->Go To ->Extend

You can add a *new destination* to the *end of your route list* using this method.

Map Screen ->Select a location ->Location Menu ->Go To ->Replace

Or Main Menu ->Find ->Find a destination ->Location Menu ->Go To ->Replace

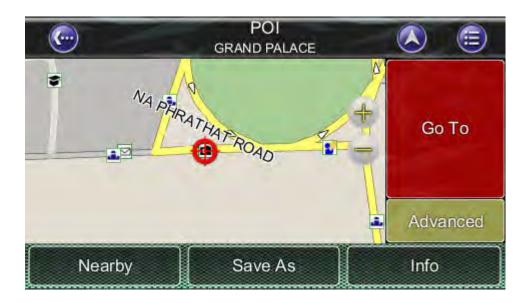

The Replace button replaces the end destination with the one you have just selected. All waypoints between the starting/current location and the end location will remain the same.

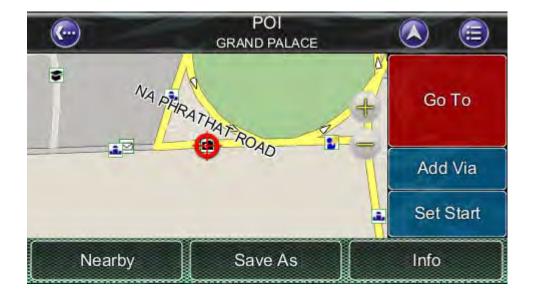

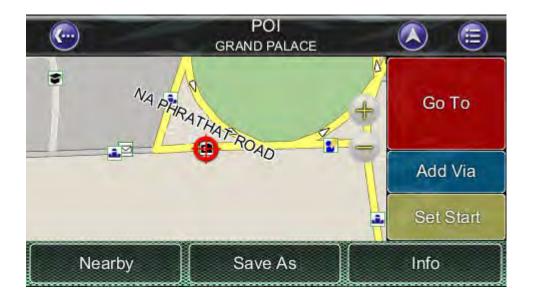

6.4 Setting Starting Locations/Clearing Routes/Setting Simulated Starting Locations

By either selecting a location in the *map screen* or from *Find menu*, Bluenavi24 will enter *Location menu*, in which you can set a start point for simulation purpose. If you would like to plan a new route to a destination, you can use the *Reset* function to delete the current route from memory. This works for both simulation and actual GPS navigation. You can also use this function to select a new starting location for simulation. If you are clearing a route then setting a new starting point, you need to do this twice.

6.5 Route Simulation

Bluenavi24 allows you to *simulate* the route to your destination without the need for GPS fixes.

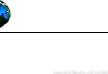

Simply set a *destination point* and *intermediate waypoints* if needed.

Press the "Go To", to calculate the route. After calculating the route, please press "**Demo**" button in the sub menu to start Route Simulation.

	9	Demo		6
0	Repeat	Speed	1x	
1	PHLOEN PH THAP THIANG	ITHAK ROAD	620 m 1 min	*
1	PHATTALUN THAP THIANG	2 km 5 min	1/4	
1	Towards PHE	2 km 6 min	1/4	
7	Towards PHE THAP THIANG	ETCHAKASEM ROAD	2 km 6 min	
		Start Demo		

6.6 Changing Routing Options

Please refer to the *Route Settings Section*, under the *Configuring the XROAD Section* of this Manual. (Please refer Section 9.12 Route Options)

(Please refer Section 9.12 Route Options)

6.7 Cancel Route

When approaching the waypoint or destination, there is a prompt window on the top left side of the screen. It allows users to cancel the routing plan to the waypoint or destination. The pop-up window shows in 300 meters as crow-fly distance.

7. Route Management

7.1 Route information

It includes information such as the *distance remaining* until next waypoint, *travel time* and *arrival time*.

©		Route Info		(
		GRAND PALACE 36 km PHRABOROM MAHA RATCHAWANG (2-9342181) 41 min					
Distance 36	km	Travel Time Arrival Tir 41 0		2 _{pm}			
Routing Method: Car (Faster)							
Rou	ite Mer	าน	Demo				

7.2 Turn List

Main Menu ->Route ->Turn List

The Turn List is a list of all corners and roundabouts (*turns*) you will pass on the way to your destination. To view a turn, press its panel on the *Turn List*. This will load a map showing the location of the turn.

¢	Turn List		E
	Towards 7 NONG PRUE	0 m <1 min	
W	Towards 7 NONG PRUE	1.5 km 2 min	
黨	Towards 7 NONG PRUE	2 km 2 min	1/4
K	Towards 7 KHLONG SAM PRAWET	4 km 5 min	
	7 KHLONG SONG TON NUN	10 km 9 min	

7.3 Itinerary List

Map Screen ->Route ->Itinerary

The Itinerary List is a list of user defined intermediate waypoints you can set on the way to your destination.

C		0	Current I Itinerar			6
*		ABHUMI IN1 UE (2-13218		ONAL AIRPOR	T Arrived	4
		PALACE ROM MAHA F		'ANG (2-934218	36 km 31) 41 min	1/1
						T
	Add	v⊆n n⊡ten		Save	Cł	ange

Press the *Change Button,* you delete waypoints or adjust the sequence of the waypoints.

To add waypoints, press the *Add Button.*

8. Managing Favourites, Itineraries and Trails

8.1 My Favourites

Main Menu ->My Data ->My Favourite

You can edit your *Favourite* destinations by accessing the *My Favourites Menu*. You can add the places of Favourites.

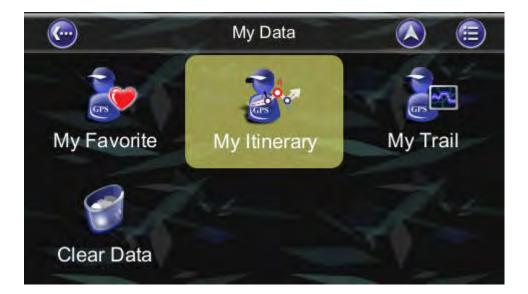

8.2 My Itinerary

Main Menu ->My Data ->My Itinerary

You can retrieve a planned itinerary by pressing *Load Button*. After having a loaded itinerary (current itinerary), you can add, edit or save the itinerary. If a route already exists before you retrieve an itinerary, a warning message will be shown.

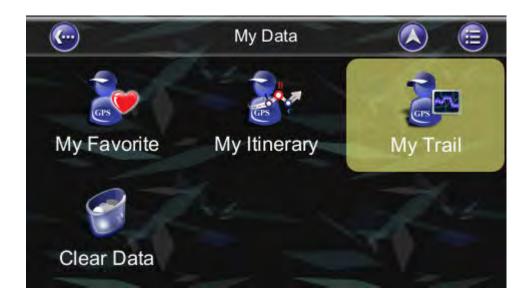

8.3 My Trail

Main Menu ->My Data ->My Trail

You can show a trail on the *map screen* by pressing *Show Button. Show/Hide* is toggled.

Trail settings allow you to record and name the travel tracks/routes you have taken to your destination when you have a valid GPS fix for future reference. You can save these and load (display) them at a later date. This is particular useful for off-road situations where no route can be calculated to your destination. Only one trail can be displayed at any time.

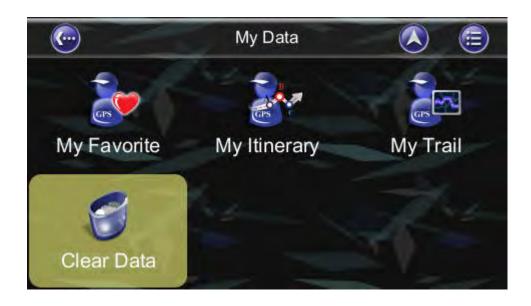

8.4 Clear Data

Main Menu ->My Data ->Clear Data

You can clear the data you have saved here.

9. Configuring the X ROAD

To change the software settings, press the Settings button on the Main Menu. Bluenavi24 offers a high degree of personalisation settings, as well as normal system settings. You can access these settings from the **Main Menu ->Settings Menu**.

9.1 General

Main Menu ->Settings

9.2 Volume

Main Menu →Settings →Sound

You can adjust the volume of the voice prompts and sound effects here, as well as enabling sound/disabling sound.

Or in *Map Screen* at left function bar to select volume setting.

9.3 Display Options

Main Menu ->Settings ->Display

The **Display Menu** allows you to change the display features used by Bluenavi24. You can adjust the colour scheme to suit your current lighting conditions for ease of visibility, the 3D view angle and font size. The **Automatic Colour Scheme Mode** changes the colour scheme automatically at sunrise and sunset each day.

(Display		6
Day/Night		Auto		
Day Skin	-	Peace		٠
Night Skin	in .	Peace		+
Font Size		Medium		
2.5D Landmark		Less		
3D Landmark		On		
Apply		Ca	incel	

The 2.5D Landmark and 3D Landmark functions are **optional**. If you've purchased these functions, you'll be able to choose these functions:

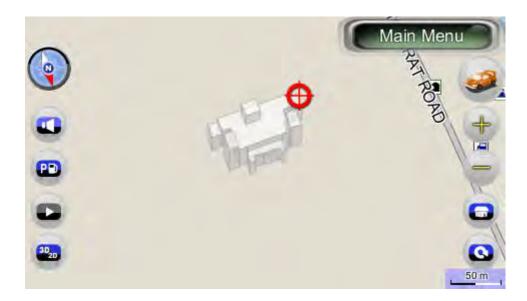

3D LandMark enable

3D LandMark / 2.5D City Model disable

2.5D enable

9.4 Language

Main Menu ->Settings ->Language

The *Language Menu* allows you to change the Settings of Bluenavi24 for use in different countries. You can change the *Text* and *Voice* prompts used by Bluenavi24. To switch dual language map's text, please kindly change the Map language from the following screen.

(Lang	uage		=
Text			English	1	•
Voice		English			•
Input Method		General			
Мар	English		ı		
				A.	
Apply			Cancel		

9.4.1 Text

In Bluenavi24 R6.0, there are over 20 texts for Menu to be selected. For R6.0.30 version new added Vietnam text.

Slovenian	Svenska
Tiếng Việt	Turkish
Ελληνικά	Русский язык
العربية	فارسي
3/	4

(New add Vietnam text)

9.4.2 Voice

In Bluenavi24 R6.0, there are over 30 prompt voices to be selected. You could change the language and apply it. For R6.0.30 version new added **Hindi** and **Vietnamese** voice.

(New added Vietnamese voice)

9.4.3 Input Method

In Bluenavi24 R6.0, users could choose the input method to be the default keyboard when enter the key words.

(English Query Keyboard)

G		Langu	uage		E
Text			Tiếng Việ	t	٠
Voice	-		Vietnames	e	•
Input Method			<u> </u>	PM)	
Мар			English	P C C	
	-	5-		1º	13-
Apply	,		(Cancel	

(Chinese BPM Keyboard)

(Arabic Keyboard)

(Persian Keyboard)

(Russian Keyboard)

(Greek Keyboard)

(Thai Keyboard)

(Thai Keyboard)

(Turkish Keyboard)

(Vietnam Keyboard)

⁽Map Language)

9.4.4 Map

For dual language map, this selection could be selected to show default map's language. For example, the Arabic map or English map for Middle countries; Thai language map or English map for Thailand.

After applying, the map will be loaded when **restart**ing Bluenavi24 in the next time .

9.5 Unit

Main Menu ->Settings ->Unit

The **Unit Menu** allows you to change Unit Settings of Bluenavi24 for use in different countries. You can change the **measuring units** (distance) and **time** (12 hours / 24 hours format) settings.

9.6 Guidance

Main Menu ->Settings ->Guidance

The Guidance Menu allows you to adjust the Map Orientation, Auto Zoom, Approaching View, Turn PIP

9.7 Time Zone

Main Menu ->Settings ->Time Zone

The *Time Zone Menu* allows you to adjust the *time* displayed by Bluenavi24 for the *area or country* you are currently in. This is useful if you are in a country that adopts daylight saving.

9.8 Safe Mode

Main Menu ->Settings ->Advanced ->Safe Mode

By enabling "Safe mode", the touch screen function will be disabled when the vehicle speed is above 40km/hr. This is to prevent drivers from operation of navigation devices. The touch screen function will be normal once the vehicle speed is below 40km/hr.

9.9 Speed Alert

Main Menu ->Settings ->Advanced ->Speed Alert

You can enable speed alerts, which will warn you when you exceed the speed alert velocity.

9.9.1 Over Speed Alert

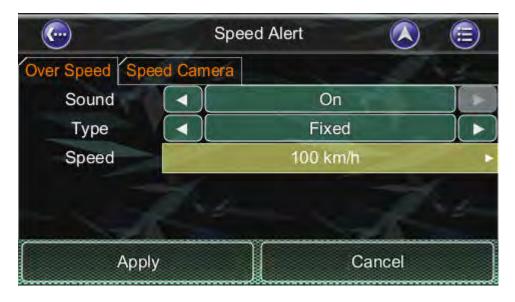

(Auto Type uses the Default Road Speed Limit value)

(Enter Speed Limit							
<enter limit="" speed="">_ Done</enter>								
1	2	3			1	@		
4	5	6			-			
7	8	9		2	&	\$		
<	0		(#			
		123	ABC	De	el	Clear		

(Fixed Type allows user to set the Speed Limit value)

Other than the above Auto and Fixed Types: there are also three types:

Auto(+5)

Auto(+10)

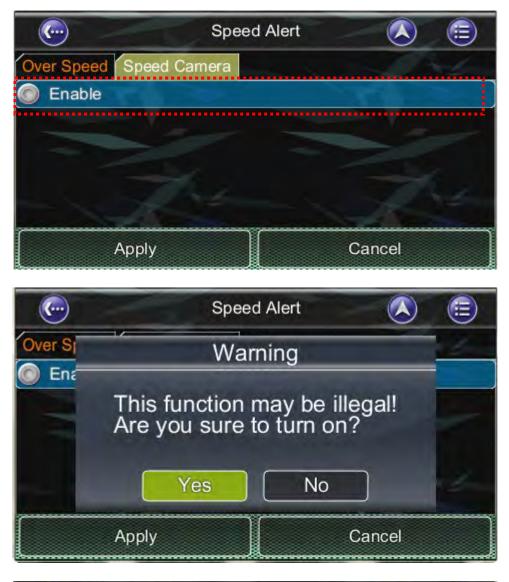

Auto(+20)

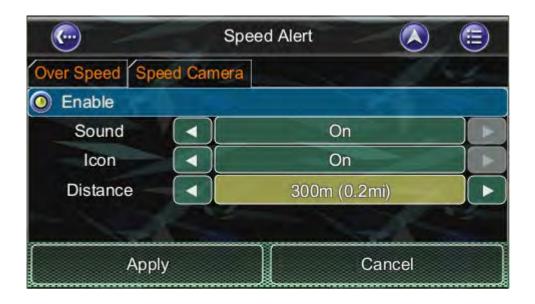

9.9.1 Speed Camera Alert

	Speed Alert	
Over Speed Speed C	Camera	Contant and
Enable		
Sound	l On	
Icon	On	
Distance	500m (0.3mi)	
	-	-
Apply	Cancel	

Note: The speed cameras sign will show when there are speed cameras in front of the car. The speed camera alert will warn you when the speed camera is approaching along the road. You will hear "**Speed Camera Ahead**" sound when it is approaching; then you will hear **one** "**Don**" sound when you deviate from the speed camera.

If you are over speed limit, you'll read the red speed in the bottom right corner and will keep hearing "**Drive Slowly**" sound. This function could be enable or disabled.

9.10 POI Icon

Main Menu ->Settings ->Advanced ->POI Icon

You can reveal, hide all or just some POI icons for ease of visibility on the *Map Screen. Select the icons* you wish to have displayed or hidden on the *Map Screen*, then press the *Done Button*.

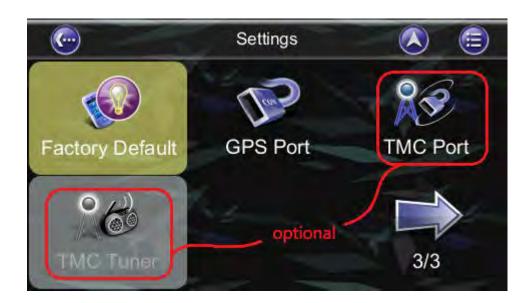

9.11 Factory Default

Main Menu ->Settings ->Advanced ->Factory Default

If you would like to change the settings you have set, you could *restore the Factory Default Settings* and restart again.

9.12 Route Options

Main Menu -> Route ->Route Options

Route options take your preferences into account when calculating the route to your destination. It is affected by the following parameters, which you can set:

	Rou	ute Options		
Vehicle Type		Car		
Routing Method	Faster			
Avoid Highway		O Avoid Toll Road		
Avoid Minor Ro	ad	Avoid Ferry		
Ignore Traffic F	Rule			
Ask every time before planning				
/Angliptky		Cancel		

• Vehicle Type: Car, Bicycle, Walker can be selected.

• **Routing Method:** Shorter (distance), Faster (time), Economic (heuristic) routing algorithm can be applied.

• Avoid Highway: Highway won't be considered as route solutions.

• Avoid Minor Road: Minor roads in communities or paved for walker won't be considered as route solutions.

• **Ignore Traffic Rule:** one-way or manoeuvre traffic rules won't be considered as route solutions.

• Avoid Toll Roads: the route won't take roads with tollbooth as solutions.

• Avoid Ferry: ferry won't be considered as route solutions.

• Ask every before planning: enable this function will let user to set the Route Option every time he plan a route.

To select or deselect a parameter, press the relevant panel on the screen. Once selected, it will be highlighted by a check.

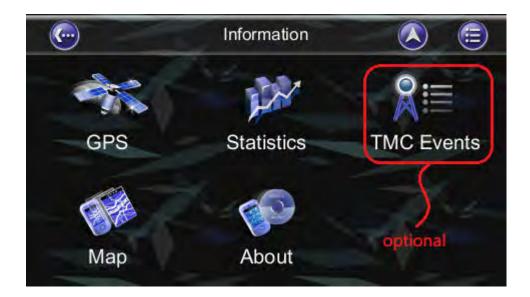

10. Information

Main Menu -> Info

The Information Menu gives you information about your route, itineraries, destinations, locations and maps.

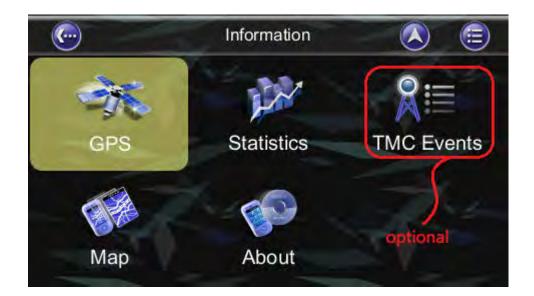

10.1 GPS

Access information about satellite coverage, current time, longitude, latitude, altitude, quality of the signals received and the status.

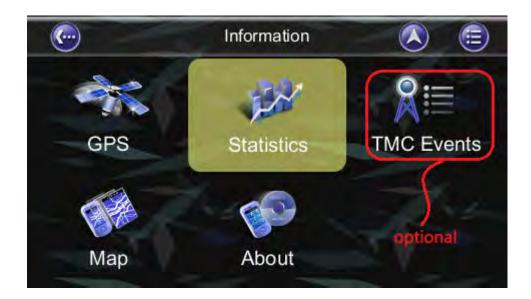

<u></u>			(Lo		PS ie) 06:2	21 pm		Ø		=

10.5 TMC Events

Access information about TMC information if your GPS device has TMC function.

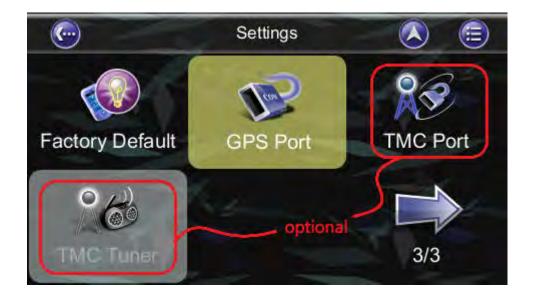

11. GPS Settings

The *GPS screen* contains information about the current satellite coverage, current time, longitude, latitude, altitude, quality of the signals received and the status of the GPS receiver. To access the GPS Information page, press the *Main Menu ->Info ->*. *GPS Button* (Please refer Section 10.1)

For the setting of the GPS Port and Baud Rate, please go to the *Main Menu ->Setting* ->*GPS Port* to set the GPS Port and Baud Rate. Choose **Auto** to auto-detect the COM Port and Baud Rate.

When you run Bluenavi24 for the first time on your machine, you need to *configure your GPS* settings.

For more information, please read your *GPS hardware instructions*, and the **Hardware Setup** section from this manual.

Normally, you will only need to configure your GPS hardware once.

12. Disclaimer

Bluenavi24, Inc. takes no responsibility for any use of this product that may result in law violation and/or accidents leading to personal injuries and/or property damage. It is the user's own responsibility to operate the product in a prudent manner that will comply with the law. Bluenavi24 will take no responsibility for the consequences caused by inaccurate satellite transmissions. The Government of the United States of America is solely responsible for the accuracy and maintenance of the GPS system.

13. Important Messages

- **Warning**: Do not operate Bluenavi24 and a vehicle simultaneously as this is very dangerous. The vehicle must be parked prior to operating Bluenavi24. It is your sole responsibility to operate Bluenavi24 and the vehicle in a prudent manner. Misusing Bluenavi24 may result in accidents and may lead to injuries and/or property damage. Only a passenger should operate Bluenavi24 while the vehicle is in motion.
- **Caution**: Do not use Bluenavi24 as a medium to generate precise readings of altitude, direction, distance, location or topography. Bluenavi24 must only be used as a navigational aid. Any information generated from Bluenavi24 must only be used as reference.
- **Caution**: Although every attempt has been made to ensure the accuracy of the maps and the data used by Bluenavi24, the location of points of interest, transportation networks, etc may change over time without notice therefore rendering the data obsolete. Therefore it is essential that you check the actual surroundings with Bluenavi24's maps in order to confirm that you are at the exact destination.
- **Caution**: Bluenavi24 cannot guarantee that any parts of the planned route will be dangerous, closed to traffic, or restricted to certain types of vehicles or is congested. Therefore it is your responsibility to determine the safety of the suggested route and to ignore any illegal or unsafe routes.
